

The Islamic Military Counter-Terrorism Coalition (IMCTC) holds a workshop on "Envisioning the Prospect of Violent Extremism Landscape"

Riyadh – 14/10/2021

IMCTC held, at its HQ in Riyadh, a workshop on: "Forecasting Violent Extremism Landscape," moderated by Dr. Abdullah Al- Dowah, an IMCTC Staffer, in the presence of IMCTC Secretary-General and member countries' delegates.

Over the course of the workshop, the participants discussed the current reality of violent extremism, its future prospect, and the possible rise of online ideological radicalization, at the individual and organizational levels, for violent extremist organizations post-COVID-19 pandemic.

It is worth noting that this workshop is part of a series of ideology domain-focused symposia, presentations, and seminars held regularly by IMCTC. The ideology is part of IMCTC's four key counter-terrorism domains, namely, (ideology, communications, counter-terrorist financing, and military).
